Customer Problem Statement Template:

Developing a problem statement is essential for capturing the user's perspective. This framework aids in prioritizing core features to design digital products that truly resonate with the audience.

A precisely defined problem statement helps teams identify the most effective paths to address user pain points. By engaging in this definition process, you can better empathize with your target audience and gain deeper insights into how they interact with your software solutions.

I am	A regular digital consumer or a store administrator.
I'm trying to	Locate products efficiently or oversee online stock levels.
but	Current platforms offer sluggish performance and complex navigation.
because	The current architecture lacks a modern, unified MERN stack implementation.
which makes me feel	Demotivated and disconnected from the shopping or management process.

Example Entry:

[I am: A Parent] [Trying to: Buy kids clothes] [But: The site crashes] [Because: It is not scalable] [Feel: Annoyed]

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Mobile-centric user	Navigate and view new seasonal inventory	The filtering system is slow on handheld devices	The front-end design isn't fully optimized for mobile responsiveness	Frustrated and unlikely to purchase
PS-2	Store Administrator	Modify product availability in real-time	Individual item editing is tedious and slow	The current management portal lacks batch update capabilities	Stressed and unproductive
