

Ideation Phase

Empathize & Discover

Date	18 June 2026
Team ID	
Project Name	ShopEz
Maximum Marks	4 Marks

Empathy Map Canvas:

The empathy map visualizes user expectations and sentiments to provide a clearer understanding of fundamental consumer requirements. This methodology promotes a design-driven approach that addresses both user objectives and the technical hurdles inherent in the ShopEz development lifecycle.

<u>Think & Feel</u> • Is individual data handled securely? • How accurately does the image represent the product? • Will the shipping be prompt and reliable? • Prioritizes both product value and build quality.	<u>See</u> • Detailed and clear visual representations of items. • Pricing benchmarks against market competitors. • A fluid, mobile-first web interface. • Automated alerts regarding shipment progress.
<u>Hear</u> • User feedback regarding long-term reliability. • Social media trends and style endorsements. • Ongoing discussions about cybersecurity in retail. • Referrals from peers about the platform's usability.	<u>Say & Do</u> • Completes account setup and explores inventory. • Applies filters for specific attributes (size/ color). • "I prefer a direct and intuitive checkout path." • Navigates through Men, Women, and Kids categories.

Pain Points

- Oversimplified or overly complex signup steps.
- Hardware-intensive pages that lag on mobile devices.
- Ambiguous information regarding shipping velocity.
- Navigational friction when applying complex filters.

Gains

- Superior responsiveness via the MERN ecosystem.
- Rapid retrieval of desired search result sets.
- All-in-one dashboard for past purchase history.
- Efficient SKU and inventory management for admins.
